SUMMARY

Front-end software engineer with 2 years of experience in web development. Possesses a keen eye for detail and a passion for developing innovative and user-friendly web experiences. Seeking new opportunities as a front-end developer or UX designer on a creative and collaborative team.

TECHNICAL PROJECTS

REFORMATION
post-production for Salesforce ecommerce site
- Designed and engineered solutions to frontend styling and performance bugs on theformation.com ecommerce site
- Utilized Sass, JavaScript, ISML templates, and Salesforce Business Manager to complete all assigned tickets to customer's satisfaction

IMPASTA SYNDROME
an app for storing and sorting through gluten-free recipes
- Utilized JSON web tokens and localStorage to store encrypted user data.
- Designed a fun and unique in-browser experience using Vanilla CSS.
- Engineered input forms that enable users to dynamically create lists of ingredients and instructions for recipes.

GROOMSMART
an app for managing your pets' grooming appointments
- Curated a branded, professional user experience using Vanilla CSS.
- Designed backend server on Ruby on Rails framework with ActiveRecord responsible for returning and persisting data.

EXPERIENCE

SALESFORCE ECOMMERCE FRONTEND DEVELOPER
BORN GROUP - REMOTE | 2021 - PRESENT
- Participated in a 3 month full-stack training program to learn Salesforce B2C Ecommerce for Developers
- Completed all assigned tickets in a timely manner utilizing knowledge of frontend design patterns and frameworks.
- Provided QA on all assigned tickets and completed code reviews and QA for team's development solutions.
- Debugged frontend issues for post-production clients, which increased client retention by 20%.
- Participated in daily scrum calls and weekly sprint planning meetings.
- Successfully supervised and collaborated across a 15-person team in preparation and execution of weekly development sprints.

CHILDCARE PROVIDER
PRIVATE FAMILIES - CHICAGO, IL | 2018-2021
- Lovingly provided hands-on solutions and care to demanding clients between the ages of 6 months - 9 years.
- Carefully followed parents' expectations and requirements with agility; troubleshot care plans accordingly.
- Fostered safety and assessed quality of environment for a child with special needs.
- Regularly exercised resilience, attention to detail, and de-escalation.
